Internet speed test

Internet speed test

Check your Internet connection speed. It's fast if you have lots of **data**, but may take time.

To run the test, you will need to connect to the Internet. This will share bandwidth with them and provide accurate results. You can also publicly publish your results so others can see how fast your connection is.

About

Sorry, it looks like there's a problem with your connection.

The test can't be completed due to a problem with the network. Try again later.
